

CERES Aqua Beta1 SSF Aerosol Properties - Accuracy and Validation

The Aqua Beta1 SSF aerosol data have not been evaluated. The data were created using the same algorithms as were used for Terra Edition1A SSF. Users are, therefore, asked to see the [Terra Edition1A SSF section on CERES Aerosol Properties - Accuracy and Validation](#). However, users are reminded that there are severe problems with Aqua MODIS channel 6 (1.64 μm).

These data products are NOT regarded as publishable and will not be maintained in the archives.

We invite users to report any problems observed with this product.
